

GEOFFREY K. ROZINAK

AI Product & Engineering Leader | Mission Software at the Edge

Fayetteville, NC 28312
(910) 568-8026 | geoffrey.rozinak@gmail.com
resume.rozinak.us

Active Clearance: TS/SCI | U.S. Citizen

PROFESSIONAL SUMMARY

Technology leader with 10+ years spanning software engineering, product management, and field delivery of mission-critical systems for the DoD and Intelligence Community. Experience ranges from hands-on full-stack development and AI/ML integration to managing product teams and owning platforms end-to-end — building Generative AI capabilities (LLM clusters, RAG, vector stores) and fielding them into classified, disconnected, and tactical-edge environments. U.S. Army Reserve officer (MAJ promotable to LTC) and Certified Scrum Master with a track record of mentoring engineers, leading cross-functional coalitions, and turning ambiguous operational needs into shipped software.

CORE COMPETENCIES

Leadership & Product: Team Leadership & Mentorship, Product Ownership, Roadmaps & Backlog Management, Discovery & User Research, Design Sprints & Workshops, Certified Scrum Master, Agile / Scrum / XP, Stakeholder & Executive Communication

AI & Data: Generative AI & LLMs, Retrieval-Augmented Generation (RAG), Vector Databases, Prompt Engineering, VLM / Multimodal Integration, AI Risk & Responsible AI, Geospatial Data (CoT / GeoJSON, TAK, MIL-STD), Data ETL

Engineering: Node.js, React.js / TypeScript, C# .NET Core MVC, Java, Docker, Microservices & REST APIs, Test-Driven Development, Automated Journey Testing, Linux / Bash, System Integrations (SFTP, XMPP, AWS S3, SMB/CIFS)

Field & Mission Delivery: Tactical-Edge & SCIF Deployments, Offline / Disconnected Installers, Deployment Playbooks & Runbooks, Secure Software Delivery, DoD / IC Mission Software, Six Sigma Green Belt

PROFESSIONAL EXPERIENCE

Partner Engineer — Field Engineering & Integrations 09/2024 – Present

TurbineOne (Mission AI / Frontline Perception System) · Remote (Fayetteville, NC)

- Sole developer and owner of the Alert Integration Service — a backend microservice routing AI/ML detections into customer command-and-control systems across five integration paths (TAK, SFTP, XMPP, AWS S3, SMB/CIFS).
- Built operator-configurable CoT / GeoJSON transformation and MIL-STD symbology selection, plus a Vision-Language Model integration that auto-generates structured SALT / SALUTE reports in the field.
- Engineered offline installers enabling deployment and troubleshooting of FPS inside SCIFs and comms-contested environments.
- Onboarded and mentored 4–6 field engineers; authored the FPS onboarding guide and maintain a printable field-engineering troubleshooting reference.
- Ran training and served as technical point of contact with customers and leadership across operational events spanning seven partner organizations.
- Led as the first field engineer supporting operational users in an active warzone; drove 18th Airborne Corps “Scarlet Dragon” experiments and Trident Spector 2025 (top-10 debut), contributing to an operational contract.
- Created automated journey tests streamlining deployment across diverse edge devices.

Senior Software Engineer — Generative AI 10/2023 – 09/2024

Joint Special Operations Command / Ops Apps · U.S. Army Reserve (MAJ / O4) · Fort Liberty, NC

- Spearheaded development of ChatGPT-style AI capabilities on secure networks isolated from the public Internet; established a cluster of LLM workers and a vector store powering Retrieval-Augmented Generation (RAG).
- Designed and built a React.js client for AI services, improving user interaction within secure environments.
- Filled Product Manager, UX/UI, and engineering roles end-to-end, aligning AI integration with organizational goals.
- Ran prompt-engineering experiments that measurably improved problem-solving capability and service delivery.
- Managed AI-related cybersecurity and risk, ensuring responsible use of AI/ML in line with strategic objectives.
- Led a cross-directorate coalition to deploy the AI solution to the broader enterprise.

Senior Software Product Manager 02/2020 – 10/2023

Joint Special Operations Command / GAP-Ops Apps · U.S. Army Reserve (MAJ / O4) · Fort Liberty, NC

- Managed two product teams, focusing on user-validated features and translating complex business logic for software engineers.
- Improved Joint Operations Center workflows, enabling data-driven decisions across the command.
- Initiated policies for streamlined software delivery, reducing technical debt and time to production.
- Led 2 successful Design Sprints with dozens of participants; presented software best practices to UK Special Forces.

- Led a project that reduced a critical 40-minute process to 5 minutes through modern architecture.
- Advised JSOC J3, transforming a week-long information-request process into minutes with efficient ETL.

Senior Software Engineer 01/2019 – 02/2020

Joint Special Operations Command / GAP-Intel · U.S. Army Reserve (CPT / O3) · Fort Bragg, NC

- Full-stack development using React.js and Java on an extreme-programming team practicing test-driven development.
- Led an on-the-job software engineer training initiative, raising team proficiency while delivering capability to JSOC.
- Implemented a TDD policy that eliminated dedicated QA positions, saving over \$65,000/yr while delivering software with minimal issues.

Senior Software Engineer 06/2018 – 01/2019

General Dynamics IT / Joint Special Operations Command J6 · Fort Bragg, NC

- C# ASP.NET MVC full-stack engineering; collected customer requirements and translated them into deliverable code.
- Consulted J6 development leadership on a sustainable software development plan; lessons learned continue to shape software policy at JSOC.
- Created a boilerplate app standardizing design across the J6 and streamlining creation of new applications.

Software Engineer 06/2015 – 06/2018

Lockheed Martin / Joint Special Operations Command J4 · Fort Bragg, NC

- C# ASP.NET MVC full-stack development in an Agile Scrum environment, self-managing scope with minimal oversight.
- Led a major initiative to automate journey testing, saving hours of manual testing and increasing confidence in production releases.
- Developed several desktop applications to bridge capability gaps, driving greater efficiency for the customer.

Human Resources Information Systems Manager 01/2013 – 06/2015

U.S. Army, 82nd Sustainment Brigade · Active Duty (CPT / O3) · Fort Bragg, NC

- Led a crucial software development initiative implementing the Defense Digital File Management System, reducing lost paperwork to 0%.
- Drove a policy initiative for a new data warehouse delivering fast, accurate custom reporting to key leaders and executives.
- Automated monthly Unit Strength Reporting, reducing a one-week process to 20 minutes.

Human Resources Platoon Leader 09/2010 – 12/2012

U.S. Army, 82nd Sustainment Brigade · Active Duty (1LT / O2) · Fort Bragg, NC & Ali Al Salem AB, Kuwait

- Developed a passenger tracking application replacing an aging \$500,000 system at zero cost to the government and 10% more efficient than its predecessor.
- Hand-selected by senior leadership to execute a two-week training exercise for 60+ Active Duty, National Guard, and Reserve personnel; all students achieved satisfactory scores.

EDUCATION

B.S.B.A., Finance / Economics — Slippery Rock University, Slippery Rock, PA (2005 – 2009)

A.S., Automotive Technology — Community College of Allegheny County, Pittsburgh, PA (2003 – 2005)

CERTIFICATIONS, TRAINING & AWARDS

Certifications & Training: Certified Scrum Master (2023), U.S. Army Command & General Staff College (2023), Combined Logistics Captains Career Course (2019), Six Sigma Green Belt (2015)

Awards: Joint Service Achievement Award (2022), Army Commendation Medal (2015), Meritorious Service Medal (2012), Army Achievement Medal (2010), Outstanding Senior Economics Major (2009)

Military Service: U.S. Army Reserve Officer — Major (P), selected for promotion to Lieutenant Colonel. Active TS/SCI clearance.
